CAT REPELLENT PROFESSIONAL™

CAT REPELLENT PROFESSIONAL™ provides strong repelling power without harming pets, people or the environment. This new product was specially formulated **and tested** to naturally train cats to avoid treated areas and is both easily applied and long lasting. Use in landscaping, gardens and outdoor potted plants to keep cats away.

TO APPLY: Apply Professional Cat Repellent using the scoop provided in the bucket.

One scoop will cover approximately 40 square feet.

- Cover areas where cats repeatedly use for defecation.
- Apply 2 times, 14 days apart to the same area. Then reapply 30 days later.

We suggest to dig out or rake out any previous cat droppings before application. Can also apply in outside potted plants without fear of or hurting the plants. Not For Use Inside Homes or Buildings.

ALL SEASON USE: Pet cats, both owners & others in the neighborhood, often create outdoor litter box areas in flower beds, shrubs and planting areas making gardens bad smelling and unsanitary for children and other pets. Feral cats, born from strays, frequently establish lounging and litter box areas within suburban and other settled areas. Many carry illnesses, mange and parasites and can transmit them to treasured pets.
