IGUANA SCRAM™ PROFESSIONAL

IGUANA SCRAM PROFESSIONAL™ provides strong repelling power without harming pets, people or the environment. This new product was specially formulated *and tested* to naturally train Iguanas to avoid treated areas and is both easily applied and long lasting.

FLOWER BEDS, SHRUBS, GARDEN: Sprinkle by shaking the jug to form a border approximately 15 to 18 inches out from the edge of the bed with a 20-24 inch band of Iguana Scram.

Apply so it is visibly heavy enough to see. Sprinkle around tree bases to keep iguana's from climbing tree to get to any vegetation.

FOR EXCESSIVE PROBLEMS IN HIGH IGUANA DENSITY AREA: Apply as above and Add a second band 15 inches out from the first strip around the bed and broadcast Iguana Scram lightly throughout the inside of the bed. This will stop the problem and only a single band nearest the bed will be needed thereafter for maintenance applications going forward.
